*Jun 2023 - Mar 2024*

- Developed and maintained full-stack web applications, integrating front-end and back-end solutions.
- Built backend systems using Node.js, Express.js, MongoDB, and MySQL.
- Designed and implemented interactive front-end interfaces using JavaScript, React.js, Next.js, and TypeScript.
- Followed Agile methodologies to ensure efficient project delivery and team collaboration.

## LATEST PROJECTS

### Community Support Platform - HopeLink

#### Description:

Developed a community platform to support displaced individuals by connecting them with resources, shelter, and assistance. Users can find housing, request or offer donations, and organize volunteer services. The platform prioritizes community support through an accessible and streamlined experience.

### Local Services MarketPlace- craftVista

#### Description:

Developed a platform showcasing local services and skilled workers, allowing users to browse service categories and post job offers. The platform aimed to connect service providers with potential customers in their local area.

### Automotive Platform - Monla-LLC

#### Description:

Developed an online platform for car products and repair services, allowing users to browse, purchase, and schedule services. The platform aimed to provide a convenient and streamlined experience for car owners to find and engage with automotive services.

### Gym Portfolio - FitHub

#### Description:

Enhanced an existing gym portfolio website by adding new features such as Google authentication, dashboard with charts for performance tracking, and SEO enhancements for improved visibility. The updates aimed to enhance user engagement and improve search engine rankings.

### Technology News Platform - TechNow

#### Description:

Collaborated on the development of a platform dedicated to delivering up-to-date technology news and insights. The platform aimed to provide users with reliable and timely information on the latest tech trends and developments.
